## SMART SOLUTIONS FOR THE LABELING INDUSTRY

### LONGITUDINAL LABEL SLITTER

model **MCHSLT25**

The longitudinal label slitter satisfies the present-day necessity to make the most of the print area with the possibility to obtain more rows of labels from the same roll, and then split it through the use of the slitter.

The cutting operations are done by a common cutter blade that is located in an apposite blade holder. The slitter has an external auto-switching 100/240VAC - 2.5A at 24V  $\overline{\text{---}}$  power supply and an electronic circuit controls all its functions.

The new slitter, equipped with two 3" fixed core holder is able to work rolls with a diameter of 250mm. The maximum width of the roll is 220mm and it is possible to obtain rows of labels not narrower than 22mm.

Thanks to the connector equipped with the device it is now possible to use the slitter on-line with your label printer.

#### **Specifics**

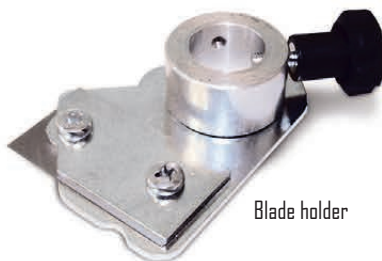

- 100/240V Power Supply
- 2 Blades included
- 3" fixed core holders
- Outside roll diameter up to 300mm
- Media width up to 220mm
- Minimum slitting width 22mm
- Manual speed adjustment

#### **Slitter's dimensions**

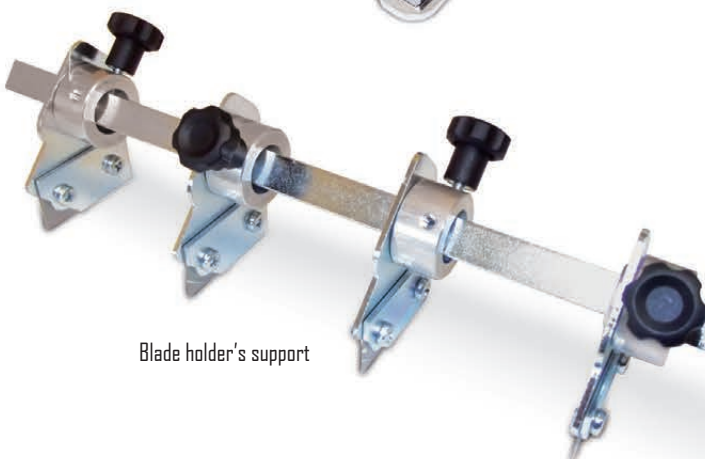

Height: 370mm  
Width: 425mm  
Length: 720mm  
Weight: 25kg
