Fast & Flexible

With a speed of 14 ips, the B-EX4T1 boasts a 40% improvement in productivity on the SX range (10 ips). Ethernet and USB 2.0 are standard with options for parallel, serial and wireless LAN. It is fully compatible with the B-SX range, allowing for the swift migration of legacy printers. In addition, advanced processing capabilities facilitate high throughput.

Usability

Continuing on from the easy operation of the SX range, the B-EX4T1 range also incorporates a user-replaceable snap-in printhead and platen roller, further reducing maintenance costs. The unique intuitive graphical LCD 'helpdesk' display improves usability and prompts even the novice user to take immediate corrective action where necessary, keeping user training to a minimum.

Durability

Toshiba has packaged the superior design elements of the market-leading B-SX4 into the matt-black B-EX4T1 to provide customers with a high-end industrial product at a mid-range price. Features include: side opening; double ribbon motor control; automatic centre media loading; near-edge or flat printhead; optional ribbon save; BCI (Basic Command Interpreter) compatibility. (Toshiba uses Basic Command Language to control the printer's interface).

Enhanced Functionality

The B-EX4T1 boasts further sophisticated features: data logging function; internal file storage; automatic thermal printhead DPI detection.
